PROFESSIONAL SUMMARY

React and React Native engineer who builds and ships customer-facing products end-to-end, with a full-stack mindset spanning component-based React architectures, mobile apps, and backend services. An early and deliberate adopter of agentic engineering — using AI coding agents (Claude Code, Cursor) as daily thought partners to onboard onto unfamiliar codebases, move faster, and ship with verification habits built in. Experienced with high-velocity, experimentation-driven development: A/B testing, feature flags, CI/CD, and solid automated testing. Proven track record owning features from hypothesis to live release in days, not weeks.

SKILLS

Frontend & Mobile React.js | React Native (CLI & Expo) | Next.js | Redux Toolkit | TypeScript | Component Architecture

Backend & APIs Node.js (Express, MVC) | Hono.js | GraphQL | REST | Firebase | MongoDB | MySQL

Agentic Engineering Claude Code | Cursor | AI-assisted development & verification workflows | OpenAI

Testing & CI/CD Jest | React Testing Library | Maestro (E2E) | GitHub Actions | Fastlane | EAS Build

Experimentation A/B Testing | Feature Flags | Firebase Remote Config | Data-Driven Iteration

Tools Git/GitHub | Xcode | Android Studio | Sentry | Postman | Figma | Jira

WORK EXPERIENCE

Software Engineer — Code Brew Labs Jan 2026 – Present

India

- Build scalable React.js and React Native applications using component-based architecture, server-driven UI patterns, and TypeScript across the stack for performance and maintainability.
- Use AI coding agents (Claude Code, Cursor) in my daily workflow — onboarding onto unfamiliar codebases, navigating new areas of the code, and accelerating delivery while building disciplined habits around verifying AI-generated output.
- Contribute across the full stack, integrating frontend with backend services and APIs to deliver seamless end-to-end functionality.
- Manage complex application state with Redux Toolkit and collaborate with backend and product teams to turn business requirements into polished, user-facing features.

Software Developer (Mobile & Full-Stack) — Codobux Pvt. Ltd Jun 2025 – Dec 2025

Mohali, India

- Served as the core and sole frontend developer for multiple production apps built from scratch with React Native CLI, Expo, TypeScript, Redux Toolkit, and Firebase, delivering pixel-perfect UIs across Android and iOS.
- Designed, deployed, and maintained Epic Voicemails — a full-scale React Native app with a large active user base — owning the full lifecycle from architecture to App Store release.
- Built backend endpoints and services to support app features, integrating frontend and backend seamlessly for end-to-end delivery.
- Ran A/B tests and feature flags (Firebase Remote Config) to turn hypotheses into live experiments quickly and iterate based on user behavior.
- Set up CI/CD pipelines with GitHub Actions and Fastlane / EAS Build to automate testing and App Store / Play Store deployments.

Software Engineer Intern — Pisoft Informatics Pvt. Ltd Jan 2025 – May 2025

Mohali, India

- Built responsive, animated React.js components for the official Pisoft website using TypeScript and Framer Motion, partnering closely with product designers in Figma to ship production-ready UIs.

PROJECTS

Jan 2026 – Present

Vivelon — Shopify AI & WhatsApp Automation

Next.js, Hono.js, TypeScript, OpenAI, GraphQL

- Built a complete full-stack system: an internal admin dashboard (Next.js + Hono.js) and an AI-powered WhatsApp chatbot (OpenAI + Twilio) for automated customer support.
- Authored backend services and GraphQL APIs, implemented Shopify Webhooks for real-time store sync, and integrated Mailchimp + WhatsApp for automated workflows.

Aug 2025 – Oct 2025

Epic Voicemails — Voice Gaming App

React Native CLI, Redux, Reanimated, Firebase, Sentry

- Engineered a complex audio system with playback, recording, real-time sharing, and one-click audio-to-video export for Instagram, TikTok, and YouTube.
- Integrated in-app purchases, subscriptions, and ads; implemented end-to-end tests with Maestro plus unit tests to reduce production regressions.

Jul 2025 – Sep 2025

Randavu — Social Networking App

React Native, Redux Toolkit, Firebase, Mapbox

- Built an Instagram-like interactive feed and real-time chat with Firebase and Redux Toolkit, plus an advanced Mapbox interactive map with live waypoints and event-based meetups.

EDUCATION

Aug 2021 – May 2025

Bachelor of Technology in Computer Science | GPA: 8.5

Punjabi University, Guru Kashi Campus, Talwandi Sabo, Punjab
